

Duplex Strainers

Duplex strainers are ideal for applications where the requirement for a continuous supply of oil which does not permit interruption of the flow for the routine cleaning of the strainer baskets.

- 180 degree handle movement to switch baskets
- Handle blocks access to the basket that is in use to protect against inadvertent opening, and provides positive visual indication of the active strainer
- There is not restriction to flow as the handle is moved from one position to the other, the handle can even be left in the intermediate position
- Covers are sealed with O-ring gaskets with quick opening bolts for easy gasket access
- 200 psi one piece design cast iron bodies
- Standard gaskets are 3/64" perforated with 40, 60, 100 and 200 mesh baskets available as options
- Consult factory on sizes and end connections as some are available in screwed connections and some are available in flanged connections. Sizes range from 3/4" to 4" connections
