Sight Flow Indicator

Sight flow indicators are used to provide positive visual indication of fuel oil flow from pump sets or return pumps. They are typically used on the outlet of a pump set or on the flow control manifold feeding oil to a generator day tank.

- Double windows for easy viewing of flow
- Highly visible impeller (ABS material)
- 1/4" to 2" sizes
- NPT connections
- Bronze Body

Model 300

Subject to Change without notice

V.1 13014.DS

Our Fuel Oil Pump Set products are only a part of our complete family of equipment that makes up a typical fuel oil system. Please contact us for your complete system needs.
